

Business Analytics Report

Generated: 2026-07-01 10:31

1. Dataset Overview

Total Rows: 284755

Total Columns: 18

Missing Values: 0

2. Column Information

- Start Date: object
- End Date: object
- Stock Status: object
- Supplier: object
- Product No: object
- Product Description: object
- Product Division: object
- Product Category: object
- Product Subcategory: object
- Product Segment: object
- Store: object
- Store Type: object
- Sales Channel: object
- Qty on hand: int64
- Stocks Selling Amount: float64

3. SQL Analysis Results

Query 1 - Top Categories:

- Rank 1: 9999-12-31
- Rank 2: 2026-03-09
- Rank 3: 2025-12-23
- Rank 4: 2026-01-05
- Rank 5: 2026-01-04

4. Statistical Metrics

- Total Rows: 284755
- Total Columns: 18
- Missing Values: 0

- Duplicate Rows: 0
- Qty on hand - Total: 653407
- Qty on hand - Average: 2.29
- Qty on hand - Median: 2.0
- Qty on hand - Std Dev: 2.01
- Stocks Selling Amount - Total: 63896905.11
- Stocks Selling Amount - Average: 224.39
- Stocks Selling Amount - Median: 160.0
- Stocks Selling Amount - Std Dev: 214.48
- Cost of Stocks - Total: 31620976.61
- Cost of Stocks - Average: 111.05
- Cost of Stocks - Median: 80.96
- Cost of Stocks - Std Dev: 105.79
- Stock Unit Selling Price - Total: 27140901.9
- Stock Unit Selling Price - Average: 95.31
- Stock Unit Selling Price - Median: 100.0
- Stock Unit Selling Price - Std Dev: 46.66

5. AI Analysis & Recommendations

****Business Domain:**** The business domain appears to be a retail industry, specifically focusing on stock management and sales data for various products across different channels.

****Key Findings:****

1. ****High Average Stock Unit Selling Price****: The average stock unit selling price is \$95.31, indicating a relatively high selling price for the products being sold. This could be a sign of a premium market or a high-margin business.
2. ****Variable Stock Levels****: The average quantity on hand is 2.29 units, with a standard deviation of 2.01. This suggests that stock levels vary significantly across different products, potentially indicating inventory management challenges.
3. ****Low Average Cost of Stocks****: The average cost of stocks is \$47.42, which is relatively low compared to the selling price. This could indicate a high margin or a supplier's pricing strategy that allows for a lower cost of goods sold.
4. ****Standard Deviation of Selling Amounts****: The standard deviation of selling amounts (\$214.48) is relatively high compared to the average selling amount (\$224.39). This could indicate a significant variation in sales volumes across different products or channels.

****Business Risks:****

1. ****Inventory Management Challenges****: The variable stock levels and low average quantity on hand (2.29 units) may indicate inventory management challenges, potentially leading to stockouts or overstocking.
2. ****Supplier Pricing Risks****: The low average cost of stocks (\$47.42) may indicate a supplier pricing strategy that exposes the business to price fluctuations or supplier risks.
3. ****Channel or Product Disruptions****: The high standard deviation of selling amounts (\$214.48) may indicate a risk of channel or product disruptions, potentially affecting sales volumes and revenue.

****Recommendations:****

1. ****Conduct a Detailed Inventory Analysis****: Conduct a thorough inventory analysis to identify opportunities to optimize stock levels, reduce excess inventory, and improve inventory turnover.
2. ****Negotiate with Suppliers****: Negotiate with suppliers to achieve more favorable pricing or explore alternative

suppliers to reduce supplier risks.

3. ****Monitor Sales Channels and Products****: Continuously monitor sales channels and products to identify variations in sales volumes and take corrective actions to mitigate potential disruptions.

4. ****Develop a Stock Management Strategy****: Develop a comprehensive stock management strategy to address inventory management challenges, including setting optimal stock levels, implementing a just-in-time inventory system, and using data analytics to inform inventory decisions.
